

H&C™ SHARKGRIP®

SLIP RESISTANT ADDITIVE

<u>CHARACTERISTICS</u>	<u>CAUTION</u>	<u>CAUTION</u>
<p>H&C™ SharkGrip® Slip-Resistant Additive is a micronized polymer for addition to H&C coatings for slip resistance, fine texturing, and gloss reduction. Due to its low oil absorption and high solvent resistance, it will stir easily into most oil-based and latex-based paints and other coatings with minimal effect on the coating's viscosity. Its low density allows it to stay well suspended in thin materials such as stains.</p> <p>Features:</p> <ul style="list-style-type: none"> • Can be added to paints, stains, and sealers • Add to latex-based, oil-based and epoxy coatings • Spherical-shaped particles allow easy cleaning of the surface • Spherical-shaped particles provide a smoother feel under foot when used on pool decks and patios <p>Benefits:</p> <ul style="list-style-type: none"> • slip resistance • easy addition into paints and stains • good chemical and abrasion resistance • good universal compatibility without viscosity effects 	<p>Limitations: H&C™ SharkGrip® Slip-Resistant Additive will increase the coefficient of friction on the surface of a paint, but due to its small particle size, the coating that this is added to should be considered</p> <p style="text-align: center;"><u>slip-resistant but not non-skid</u></p> <p>Packaging SharkGrip is packed in 3.2 oz. containers for adding to one gallon of paint and 16 oz. containers for adding to 5 gallons of paint.</p>	<p>H&C™ SharkGrip® Slip-Resistant Additive is not hazardous and does not contain silica, but should be treated as a nuisance dust while incorporating it into its intended vehicle.</p> <p>It is recommended that when mixing into unfamiliar coatings, a small test batch and application be made.</p> <p>Not for use on wood stains.</p>
